OF THE  
**SYSTEM OF INSTRUCTION.**

---

**DEPARTMENTS.**

The plan of instruction embraces three Departments—Preparatory, Scientific, and Classical.

---

**CLASSICAL DEPARTMENT.**

The Course of Study in this Department occupies four years, and is substantially the same as the course of study in the oldest Colleges in this country.

The Classes in this Department are styled Freshman, Sophomore, Junior, and Senior, according to their grade of advancement in the course.

The following is an outline of the

**CLASSICAL COURSE OF STUDY.**

### BOOKS OF REFERENCE.

In connection with the daily recitations, constant reference is made to Andrews' and Stoddard's Latin Grammar, Andrews' Latin Lexicon, Sophocles' Greek Grammar, Liddell and Scott's Greek Lexicon, Anthon's Classical Dictionary, and Butler's Atlas of Ancient Geography.

The following works are recommended for more extended consultation by the student in private: Zumpt's Latin Grammar, Kuehner's Greek Grammar, Monk's Greek and Latin Metres, and Smith's Dictionary of Greek and Roman Antiquities.

---

### TERMS OF ADMISSION.

Candidates for admission to the Freshman Class in the Classical Department, are examined in the Grammars of the Latin and Greek Languages, Virgil, Cicero's Select Orations, Sallust, Jacob's, Colton's, or Felton's Greek Reader, English Grammar, Geography, Arithmetic and Elementary Algebra.

It is essential that the amount of Latin and Greek here specified or a full equivalent, be read. As Arithmetic and Geography are not studied in College, the preparation in them should be thorough.

Candidates for an advanced standing are examined in the studies required for admission to the Freshman Class; and also in those studies that have been recited by the class to which they desire admission. All, however, who would reap the full benefit of the course, are earnestly dissuaded from attempting to prepare themselves for advanced classes.

The stated times of such examinations for admission are the Monday preceding Commencement, and the first day of the following term. Applicants may, however, be admitted at other times during the year. No person under fourteen years of age is admitted to this department.

Young men often subject themselves to serious loss of time, and to subsequent disappointment and embarrassment, by attempting to fit for College privately, or with inadequate instruction. Those intending to pursue a thorough course will save themselves time and money, as well as superfluous labor and needless trouble by promptly placing themselves in some classical school of established character.

## SCIENTIFIC DEPARTMENT.

The Course of instruction in this Department occupies three years, and embraces all the studies of the Classical Department with the exception of the Greek and Latin Languages. The study of the French and German Languages is optional with students of this Department. The study and analysis of select English Classics are introduced into this Department for the purpose of literary culture.

The names of the Classes in this Department are Freshman, Junior, and Senior, according as they are pursuing the studies of the first, second, or third year.

The following is an outline of the

 THE RELATION OF THESE DEPARTMENTS.

## THE CLASSICS AND THE SCIENCES.

The object of the course of instruction pursued in the Classical Department, is not, as is often supposed, to teach what is peculiar to the Learned Professions, or merely preparatory to them, nor to embrace all the subjects an understanding of which is essential to one who would become truly intelligent; but to employ those instrumentalities which uniform experience shows to be most effective for the symmetrical development and discipline of the mental powers, and at the same time to communicate such fundamental principles of Science and Literature as must underlie all extensive intellectual attainment in whatever sphere. It is to qualify the student by habits of accurate thought, and by acquaintance with the spirit and the leading facts of the past as well as the present, for the independent investigation of the various subjects that may challenge his attention. It is to make him intellectually MORE A MAN—to enhance his abilities, his influence and his actual achievements in life. It is to fit him more successfully to realize an aim which no noble spirit can willingly consent to fall below, whether its sphere is to be that of the

agriculturist, the artizan, the merchant, or that of the barrister, the physician, or the clergyman.

The Greek and Latin Classics are believed to sustain a highly important relation to this great object of a truly liberal education; and careful comparison of the results of the two systems of instruction pursued in our own institution, goes far to strengthen this conviction.

The trustees, therefore, in maintaining a department in which the course of instruction is confined to the English Language and such Modern Languages as the student may choose to acquire, have no intention to lower the standard of liberal education, or in the least to depreciate the Classics. They simply design to bring the advantages of a Scientific and English education, at once systematic and thorough so far as it goes, within the reach of a class of young men who desire such an Education, and yet are hindered by their circumstances from attempting to explore a field so vast as that to which the study of the Classics is designed to introduce the student.

---

### LECTURES.

Lectures are delivered on History, Chemistry, and Natural Philosophy, and on Natural History. The course of Natural History embraces an outline of Mineralogy and Geology, a general classification of Organized Beings together with a general view of Vegetable and Animal Physiology.

---

### RHETORIC AND ELOCUTION.

In connection with the daily recitations in Elocution during the second term of the Freshman year, there is a systematic and thorough course of practice in application of the principles of the art. In addition to this, the Freshman class declaim, by divisions, once every fortnight, throughout the year. The Sophomore and Junior classes deliver original written Discussions. The Senior Class write and deliver memoriter original Orations.

The Freshman class are also exercised in Latin and Greek prose composition. The Sophomore class exhibit written Translations of passages of Latin and Greek previously assigned. The Junior and Senior classes exhibit frequent exercises in English Composition, in connection with their daily recitations in the Rhetorical Department.

---

### PRIZES.

To stimulate to excellence in the Rhetorical Department, there are three Prize Exhibitions in each year. The *Sophomore Prize Exhibition* occurs near the close of the first term, and prizes are awarded for the best and second best Declamations. The *Senior Prize Exhibition* occurs near the close of the second term, and prizes are awarded for the best and second best original Orations, and for the best English prose Composition. The *Junior Prize Exhibition* occurs Commencement week, and prizes are awarded for the best and second best original Orations, and for the best English prose Composition. The competition at these Exhibitions is open to all the members of the respective classes.

Prizes are also offered for the solution of Mathamatical Problems, and the demonstration of Theorems.

---

### EXAMINATIONS.

At the close of the third term of the Freshman year, there is an examination of the studies of the year, conducted by printed questions and written answers; at the close of the first term of the Junior year, there is a like examination upon the studies pursued since the Freshman year; and at the close of the second term of the Senior year, a like examination upon the studies pursued after the close of the first term of the Junior year. At the close of each of the other terms there is an oral examination upon the studies of the term. A special committee is appointed by the Trustees to attend the examination.

In case the examination of a student is unsatisfactory, he will be subject to a re-examination, lose his standing in his class, or be dismissed from College, as may be judged expedient.

Students who may be absent from College while the course of study is in progress, are examined on their return on the studies pursued by their class during their absence.

---

### GRADE OF SCHOLARSHIP.

In determining a student's standing as a scholar, the average of his oral examinations, at the end of any term, has one-fourth the weight of the average of his daily recitations for a term; and the average of his written examination, at each of the three times specified above, is made

equal in weight to the average of his daily recitations for a term. A Rhetorical Exercise in the Chapel, has the weight of a daily recitation for two weeks.

---

### DEGREES.

At the close of the studies of the Classical Department, the usual degree of A. B. is conferred on those whose proficiency is such as to justify it; and in like manner, at the close of the studies of the Scientific Department the degree of Bachelor in Science will be conferred on such as shall have creditably sustained the successive examinations.

---

### LIBRARIES.

Students have access to the College Library twice a week: and also to the Society Libraries, selected by the students themselves, and suited to their peculiar wants.

---

### RELIGIOUS EXERCISES.

All the students are required to attend at the reading of the Scriptures and Public Prayers in the College Chapel daily, and at the religious services in the Chapel on every Sabbath afternoon. They are also required to attend, on Sabbath morning, such place of public worship as they or their parents or guardians shall select.

---

### DISCIPLINE AND GENERAL RULES.

A record is kept by the Faculty, in which are entered, weekly, the grade of scholarship of the student, his absences from the exercises of the Institution, and such other facts as are worthy of notice with respect to his general department. From this record a Report is made out at the close of each term, and sent to the parent or guardian of each student. In case of deficiency in scholarship, negligence in study, irregularity in attendance upon the exercises of the Institution, or improper

conduct, the student will be promptly informed of the fact. It is the object of this arrangement to keep parents and guardians accurately informed with regard to their sons and wards in the Institution, and thus to secure their co-operation with the Faculty in a mild system of discipline. Whenever it is ascertained that a student is deriving no advantage from his connection with the Institution, or is pursuing courses injurious to himself or fellow students, his parents or guardian will be promptly addressed on the subject and requested to remove him from the Institution.

---

### DIVISION OF THE YEAR.

The College year is divided into three terms, with a vacation of one week between the first and second terms, and another of twelve weeks at the close of the third term, immediately following the Annual Commencement.

---

### COMMENCEMENT, TERMS AND VACATIONS.

The Commencement Exercises take place annually on the last Thursday but one of June.

The Calendar for the current year is as follows :

The Fall Term is from September 9th to December 24th.

The Winter Recess is from December 24th to January 3d, 1859.

The Spring Term, from January 3d to March 31st.

The Summer Term, from March 31st to June 23d.

The Summer Vacation, from June 23d to September 15th.

The JUNIOR EXHIBITION will be on Thursday, March 31st.

The NEXT COMMENCEMENT, on Thursday, June 23d.

The Fall Term, for 1859, begins Thursday, September 15th.

Students are required to be present during the whole of each term, unless regularly excused; and punctual attendance on the *first day of the term* cannot be too earnestly urged. Absence from a few recitations, when a new study is begun by the class, never fails to embarrass the student, and often results in failure and dismissal from College.

## EXPENSES.

## CLASSICAL AND SCIENTIFIC DEPARTMENTS.

Tuition, per annum,.....	\$30 00
Ordinary repairs,.....	2 50
Wood for recitation rooms, &c.....	2 50
Library .....	1 00
	_____
Total,.....	\$36 00

In these Departments payments are to be made to the College Treasury at the beginning of each year, as follows:

First Term, .....	\$14 00
Second Term, .....	11 00
Third Term, .....	11 00

Prompt payment in advance is insisted on in all cases.

The cost of board in private families is from \$2 to \$3 per week. Fuel, lights and washing, are in most cases an additional charge, and vary greatly with the habits of different students. Wood is worth \$3 to \$4 per cord, and washing 62½ to 75 cents per dozen.

If any student injures the buildings, books or other property of the Institution, he is liable to be charged with the amount of the damage.

A large number of students have clubbed together for the current year, and are providing themselves with good board at a saving of from seventy-five cents to a dollar per week.

---

 SCHOLARSHIPS.

Two perpetual Scholarships have been founded by benevolent individuals for the assistance of indigent students of good character and promising talents.

The HUBBARD SCHOLARSHIP entitles one student of this description to enjoy the benefits of the Institution free of charge.

The ELLIS SCHOLARSHIP secures the like privilege to two students possessing the qualifications above defined, and defrays a portion of the expenses of a third. In appropriating the avails of both these funds,

preference will be given to religious young men having in view the Gospel Ministry. None will, in any case, be permitted to enjoy the benefits of them who are not of good moral character and of decidedly promising talents and attainments; nor any who belong to secret societies, or use tobacco, or who do not comply with all the regulations of the Institution.

Pledges have been made to the Trustees, which, so soon as redeemed, will enable them to offer much more liberal aid to some twelve students.

### MANUAL LABOR.

Students who desire it, can readily obtain work of various kinds, at remunerative prices.

---

### PRIZES AWARDED.

Prizes have been awarded, during the year, to William L. English and William P. Callon, for excellence in Declamation.

---

### PREPARATORY DEPARTMENT.

The want of a sufficient number of schools, public or private, which furnish *thorough* preparatory instruction, has rendered it necessary to sustain in connection with the College, a Preparatory Department. This Department has recently been thoroughly re-organized, and placed under the control and instruction of Professors Nutting and Crampton. The large increase in the number of students shows that the Department, as thus organized, has met a want that has been widely felt.

---

### COURSE OF STUDY.

Instruction is given in the Grammar of the English Language, Adams' or Dodd's Arithmetic, Geography, Elementary Algebra, And-

rews' and Stoddard's Latin Grammar, Sophocles' Greek Grammar, Virgil, Cicero's Select Orations, and Jacob's Greek Reader. There are also exercises in Declamation throughout the Preparatory course, under the direction of Professor Sanders.

This Department is designed for those who wish to fit themselves for the shorter or Scientific Course, as well as for those who wish to enter upon the full Classical Course.
